# Tatler – The Hair Guide 2017

Tatler!

Balding at the crown, receding hairlines and things looking altogether too sparse up top are Natali's specialities. She will inspect a chap's damage, take a blood sample and extract growth factors (stay with us), before injecting it back into the scalp (deep breath) with a mechanised pen. It bolsters the follicles, Natali claims, and she'll send him home with a course of Viviscal (supplements that support hair growth). A course of three sessions, six weeks apart, is recommended. **Our Verdict** We're not saying that he'll enjoy the flurry of injections to his scalp (he won't). But the effects make it worthwhile: scalps are less visible, and hair looks genuinely thicker. Result!

**Details** Session, £475. At Omniya, 3a Montpelier Street, SW7 (omniya.co.uk; 0207 584 4777)
